

Diseases Effecting Structures of Bone - Histology

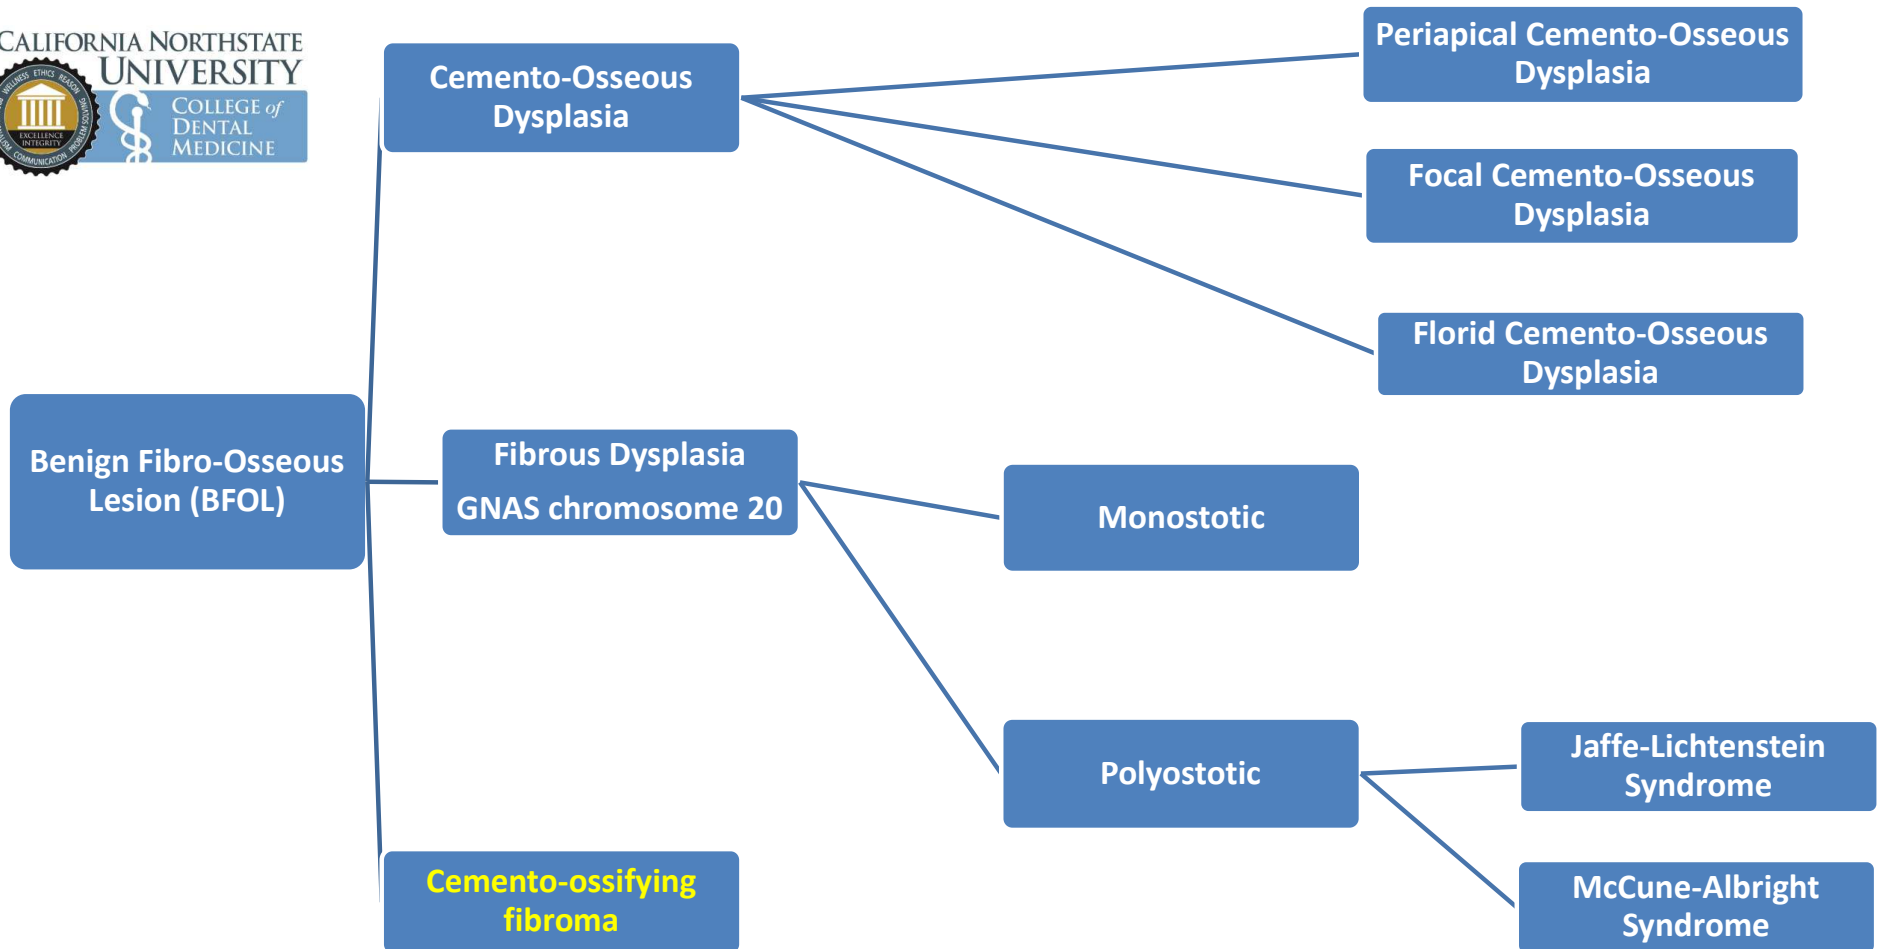

OMFS 661: Diagnostic Oral Radiology and Pathology

Rashidah Wiley, DDS, FAAOMP, Diplomate, ABOMP

Mission: To advance the science and art of health through education, service, scholarship and social accountability

Radiolucent → mixed radiopaque → radiopaque

Cemento-Osseous Dysplasia

Lamellar trabeculae, woven bone, and cementum particles deposited in connective tissue.

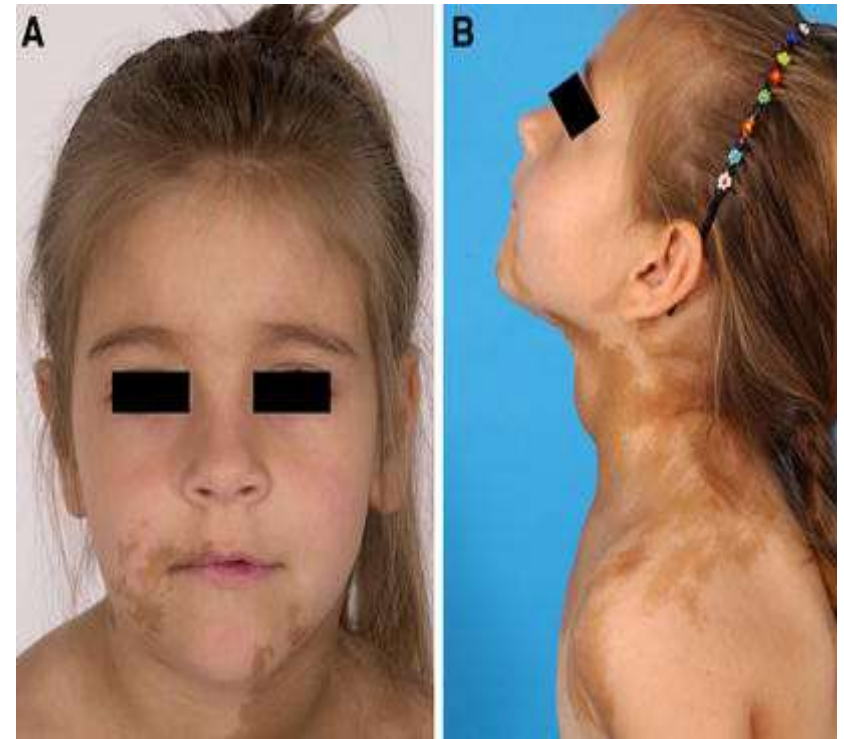

Islam NM. Cemento-osseous dysplasia. PathologyOutlines.com website. <https://www.pathologyoutlines.com/topic/mandiblemaxillafloridcemento.html>. Accessed February 8th, 2023.

California Northstate University College of Dental Medicine

Fibrous Dysplasia

- **Monostotic**
 - Alterations of one bone
- **Polyostotic**
 - **Jaffe Lichtenstein Syndrome**
 - Alterations of multiple bone
 - Café au lait pigmentation
 - **McCune Albright Syndrome**
 - Alterations of multiple bones
 - Café au lait pigmentation
 - **Endocrinopathies**
 - **Precocious puberty**

Leet AI, Collins MT. Current approach to fibrous dysplasia of bone and McCune–Albright syndrome. Journal of Children's Orthopaedics 2007 1:1, 3-17.

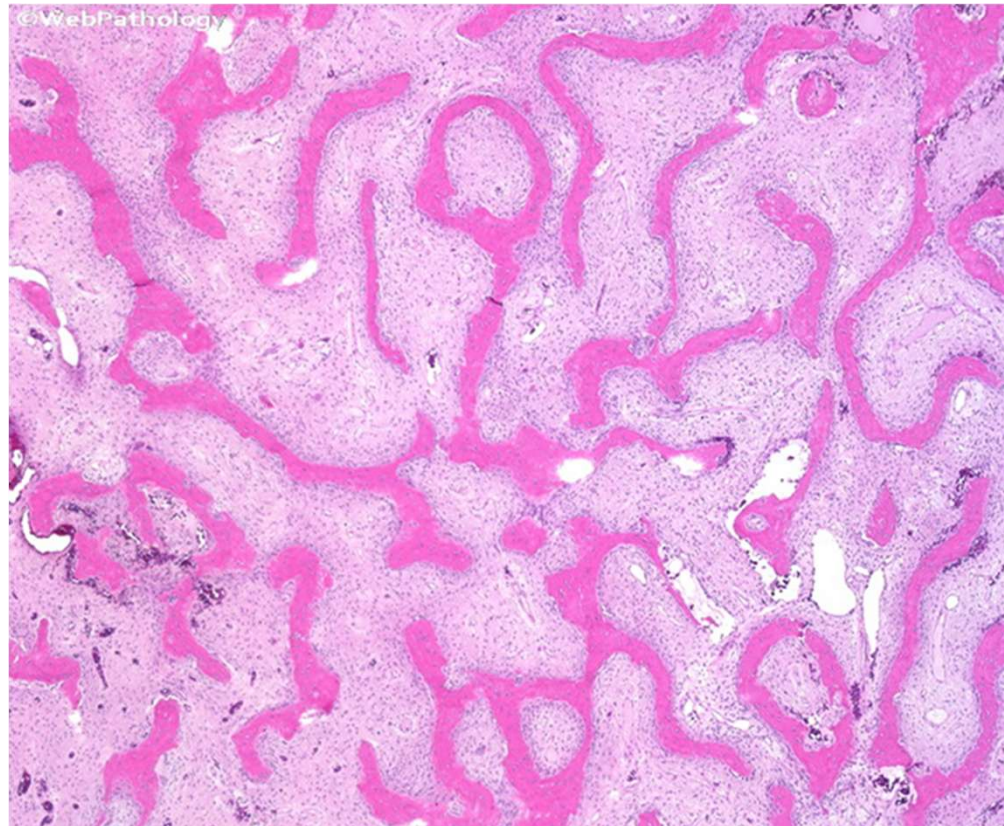

McCune-Albright Syndrome

Franco JMPL, Rêgo RD, Gomes GMF, Santos DFDS, Santos ES. Surgical Treatment of Polyostotic Craniomaxillofacial Fibrous Dysplasia Associated With Acromegalia: The McCune - Albright Syndrome. J Craniofac Surg. 2019 Sep;30(6):1806-1808.

Fibrous Dysplasia

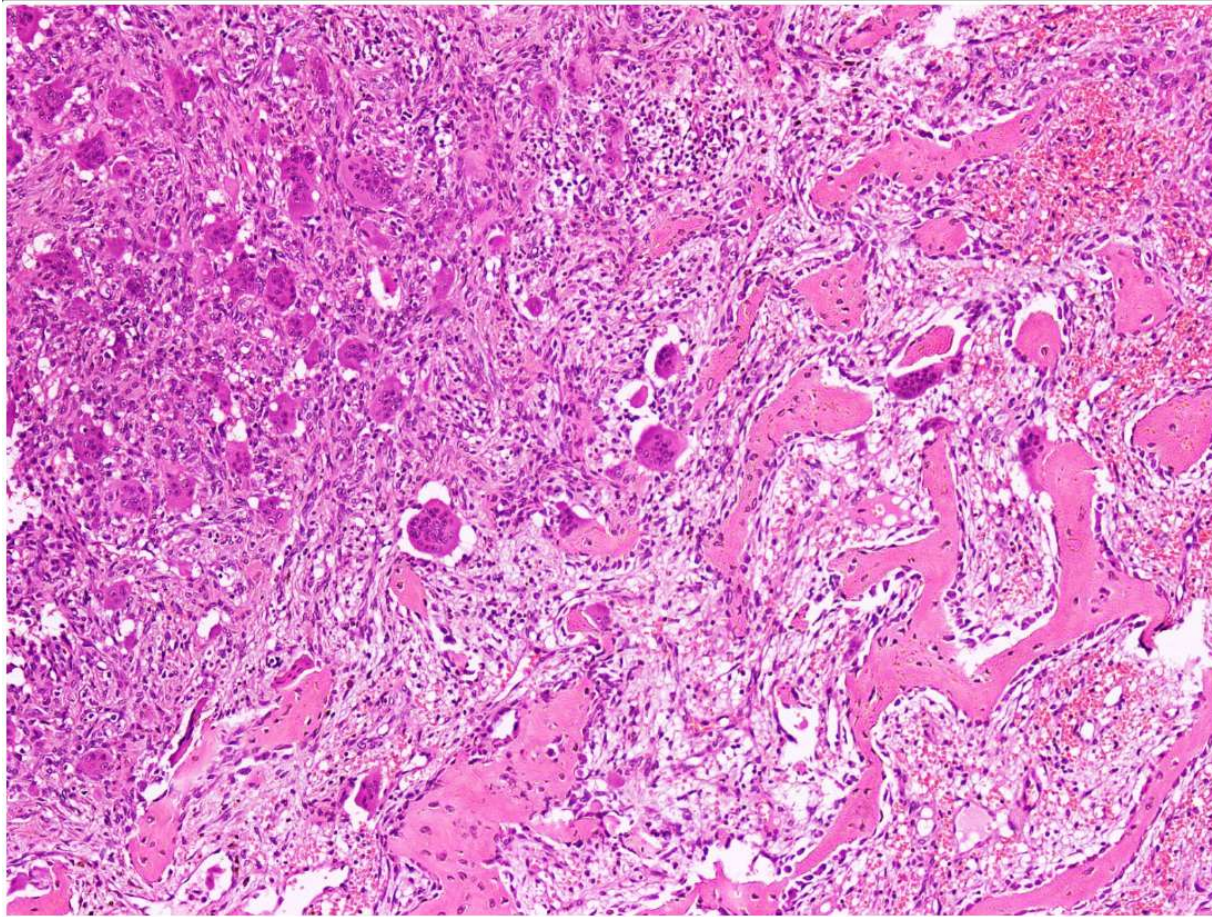

**Bone with “curvilinear” shape
deposited within connective
tissue**

Hyperparathyroidism - Brown's Tumor of Bone

- Caused by any condition associated with chronic depression of serum calcium
- **Renal failure most common cause of secondary hyperparathyroidism**
- Occurs with tumors of the parathyroid gland
- Inadequate dietary intake of vit D deficiency
- Parathyroid glands are hyperplastic
 - Serum calcium levels near normal due to compensatory increase in parathyroid hormone.
- **Bone changes (Brown's tumors) and metastatic calcification**
 - Radiolucent lesion
 - Loss of the lamina dura
 - Radiopacity "ground glass appearance"
- **Histology**
 - **Osteoclasts giant cells in fibrous connective tissue**

Brown's Tumor of Bone

The histology shows fibrous connective tissue containing multinucleated giant cells.
